DETAILED ACTION

Priority

This application claims benefit for domestic priority under 35 U.S.C. § 119(e) [to a provisional application 60/432,329 12/10/2002], is acknowledged.

Status of Claims

Claims 1-47 are currently pending in the application.

Receipt is acknowledged of amendment / response filed on May 05, 2006 and that has been entered.

Claims 33 and 35-47 are withdrawn from further consideration pursuant to 37 C.F.R. 1.142 (b) as being drawn to a non-elected subject matter.

Response to Election/Restriction

In response to the restriction requirement, Applicants have elected Group I, which includes claims 1, 3-32 and 34 drawn to a compound and the elected species as set forth found in Example 3, with traverse is acknowledged. The traversal is on the ground(s) that all the pending claims should be rejoined and examined with the elected Group I because there is no "serious burden" on the Examiner and therefore, a search and examination of the entire Markush group should be made for this application without a serious burden.

Applicant's arguments are fully considered and found partially persuasive and therefore, Examiner has agreed to modify the restriction requirements to include Group II (claim 2) to the elected invention of Group I. However, the Examiner respectfully disagrees with the Applicants other arguments because the products of Invention groups I-IV differ materially in structure and in element from each other and therefore, are capable of supporting their own patents. The

invention groups I-IV are related to a set of structurally diverse and dissimilar compounds, compositions, process of preparation and their methods of uses (chemical structures, which are similar, are presumed to function similarly, whereas chemical structures that are not similar are not presumed to function similarly), which do not possess a substantial common core wherein a reference anticipating one would not necessarily render the other obvious and to search all the above groups in a single application would be an undue burden on the Examiner. Because of many classes and subclasses in each of the Group, a separate search considerations are involved, which would impose a serious burden on the Examiner to perform a complete search of the defined areas if unrestricted. Also the fields of search are not coextensive. The wide disparity among the groups requires that many divergent fields must be searched, including all classes and subclasses of U.S. and foreign patents as well as journals and publications. Moreover, the Examiner must perform a commercial database search on the subject matter of each group in addition to a paper search, which is quite burdensome to the Examiner. Nevertheless, Examiner may reconsider to rejoin method of use claims commensurate in scope with the product claims when the case would be found in condition for allowance [provided those method claims are free from 35 U.S.C. §112 first (including written description, reach-through claim language and/or scope-enablement issues) and second paragraphs]. For these reasons, Applicant's arguments are found unpersuasive and, therefore, the requirement for restriction and election of species is still deemed proper.

Applicants preserve their right to file a divisional on the non-elected subject matter.

As set forth in the restriction requirement and an election of a single compound (or set of compounds), the invention will encompass all compounds that fall within the scope of the claim is as follows:

A compound having the formula as shown in claim 1 or claim 2 wherein:

R₄ is as defined,

X is limited to O,

R₅ is as claimed,

R₂ is as claimed and

R₃ is as claimed,

As a result of the election and the corresponding scope of the compound identified, claims 33 and 35-47 and the remaining subject matter of claims 1-32 and 34 are withdrawn from further consideration pursuant to 37 CFR 1.142 (b) as being drawn to non-elected inventions. The withdrawn subject matter of claims 33 and 35-47 is properly restricted as it differs materially in structure and in element from the elected subject matter supra so as to be patentably distinct there from.

Objections

Claims 1-32 and 34 are objected to for containing non-elected subject matter. The claims should be amended to exclude non-elected subject matter and within the scope of elected compound.
